1. EXECUTIVE SUMMARY

UNICO is a fully self-developed, utility-driven blockchain ecosystem designed to deliver **real usage, controlled liquidity, and long-term economic stability**.

UNICO functions as a **closed-loop digital economy** where staking, tier-based access, automation, trading, payments, and spending are fully governed by dynamic limits and liquidity-aware controls.

All infrastructure — including exchanges, automation engines, UNICO Wallet, ecommerce, card systems, and software tools — is built in-house and funded through developer capital, ensuring long-term alignment and independence.

---

2. CORE PRINCIPLES

- **Utility Before Speculation**
- **Fixed Supply, No Inflation**
- **Dynamic Anti-Dump Controls**
- **Tier-Based Access & Spending**
- **Gradual Liquidity Expansion**
- **Integrated Wallet Control and Developer APIs**

UNICO is engineered to grow through **usage and retention**, not hype cycles.

---

3. ECOSYSTEM OVERVIEW

UNICO integrates the following modules under one economic layer:

- UNICO Token & Staking Engine
- Tier-Based Access & Spending Controls
- Trading & Betting Automation Bots
- UNICO Wallet & Developer API Program
- Referral Program with up to 5% cashback in UNICO
- UNICO Alpha Exchange (Independent Market Maker)
- DEX & CEX Spot Exchanges
- Token & Coin Creation Platform
- UNICO Card & Payroll Infrastructure
- Zero-Commission Crypto Ecommerce
- Digital Services & Software Suite

Each module increases structural demand for UNICO.

---

4. UNICO TOKEN UTILITY

UNICO is the exclusive access and settlement asset across the ecosystem: - Staking & tier activation - Bot deployment and limits - Wallet transactions & API access - Card issuance and spending - Exchange liquidity pairing - Ecommerce payments - Referral rewards - Platform transaction settlement

There are no alternative tokens for core functionality.

---

5. STAKING, TIERS & DYNAMIC LIMITS

UNICO introduces a real-time adaptive tier system designed to maximize flexibility while protecting liquidity.

TIER LEVELS

Tier	Required Stake	Daily Spending Range
Tier 1	£1,000	£150 – £250
Tier 2	£3,000	£250 – £350
Tier 3	£5,000	£350 – £500
Tier 4	£10,000+	£500+

- Minimum £1,000 stake required to order UNICO Card
- Daily limits reset every 24 hours
- Limits dynamically recalculated based on stake, activity, liquidity, and Dump Credit Score

---

6. DUMP CREDIT SCORE (LIQUIDITY PROTECTION ENGINE)

Each account is assigned a **Dump Credit Score (0–10%)**, defining the maximum percentage of value that may exit the ecosystem over a defined period. - Adjusted in real time based on staking duration, transaction behavior, ecosystem liquidity, and tier level - Acts as an automated anti-panic and anti-whale mechanism

---

7. AUTOMATION LAYER

- Trading bots
- Market stabilization strategies
- Betting bots backed by UNICO stakes

Bot capacity and exposure are strictly governed by tier level and Dump Credit Score.

---

8. UNICO WALLET, CARD & PAYROLL SYSTEM

UNICO WALLET

- Centralized control of all ecosystem modules: staking, card, automation bots, payments, referrals
- Developer API for third-party integrations
- Supports multi-tier operations and real-time tracking

UNICO CARD

- Tier-based daily limits
- Global acceptance via licensed partners
- Crypto-native settlement

PAYROLL CARD

- Monthly and annual fees **covered by UNICO**
- Users pay **transaction fee only: 0.02%**

REFERRAL PROGRAM

- Up to 5% cashback rewards in UNICO for referred users
- Rewards automatically credited through UNICO Wallet

---

9. ALPHA EXCHANGE – INDEPENDENT MARKET MAKER

- UNICO-based liquidity
- Strict project admission
- No artificial volume incentives
- Liquidity balancing algorithms

Acts as a stability buffer before assets reach broader markets.

---

10. DEX & CEX SPOT EXCHANGES

- **DEX:** Permissionless swaps paired with UNICO
- **CEX:** Order-book based trading
- Liquidity anchored to UNICO across all markets

---

11. TOKEN & COIN CREATION PLATFORM

Projects can deploy ERC-20 compatible tokens directly through UNICO with built-in liquidity pairing and trading access.

---

12. ZERO-COMMISSION CRYPTO ECOMMERCE

- Free store creation
- Wallet-to-wallet payments
- No platform commission

13. DIGITAL SERVICES SUITE

- Website builders
- File converters
- Accounting software
- Games and educational platforms

14. DEVELOPER API & REFERRAL PROGRAM

- **Developer API:** Enables integration of bots, services, and trading into third-party apps
- **Referral Program:** Up to 5% cashback in UNICO for referrals, incentivizing ecosystem expansion

15. TOKEN ALLOCATION & VESTING (TOTAL SUPPLY: 1,000,000,000 UNICO)

Allocation	%	Amount	Purpose	Vesting / Release
Development	10%	100M	Protocol enhancements, new features	Continuous innovation
Liquidity	20%	200M	Smooth trading across exchanges	Locked for 3 years, gradual deployment to external liquidity
Rewards	20%	200M	Stakers, miners, active community	Gradual distribution to incentivize participation
Marketing	20%	200M	User acquisition, branding, partnerships	Controlled release over 2 years
Maintenance	15%	150M	Operations, infrastructure, security	As needed for ecosystem sustainability
Airdrop	10%	100M	Early adopters and community growth	Controlled distribution
Strategic Reserve	5%	50M	Emergency recovery, opportunities, compliance	Locked for 2 years, then 5% annual release

Allocation	%	Amount	Purpose	Vesting / Release
Public Participation	20%	200M	Community engagement via UNICO Chain	10% unlocked at launch, 90% linear over 18 months
Team & Advisors	10%	100M	Core contributors & advisors	12-month cliff, 2% monthly over 5 years
Burn Allocation	5%	50M	Scheduled quarterly burns	Tied to revenue & transactions

16. ANTI-PUMP & ANTI-DUMP PROTECTIONS

- Vesting schedules on major allocations
- Maximum daily transaction caps per wallet (0.5–1% of circulating supply)
- Time-locked trading to prevent rapid swaps
- AMM slippage protection
- Fair participation limits during early phases

17. FEE & TAX STRUCTURE

- Buy Tax: 0%
- Sell Tax: 0%
- Platform Transaction Fee: 0.02%

18. DEFLATIONARY MECHANICS

- Scheduled burns (5–10% of collected transaction fees)
- Buy-back-and-burn programs using platform profits
- Long-term goal: reduce effective circulating supply

19. INCENTIVES FOR HOLDERS

STAKING REWARDS

- Monthly reward: 0.2%
- Rewards accrue every 30 days
- Tokens withdrawable anytime

REFLECTION MECHANISM

- 1% redistribution among active token holders

GOVERNANCE

- DAO-based voting for ecosystem decisions

---

20. LIQUIDITY & WITHDRAWAL STRATEGY

- Initial liquidity raised on UNICO Chain
- Gradual expansion to external exchanges
- Withdrawals to external cold wallets enabled progressively

---

21. ROADMAP

Phase 1 – Foundation (Completed) - UNICO Chain deployment - Core platform infrastructure - Staking & tier system

Phase 2 – Utility Expansion (Active) - Automation bots - UNICO Wallet & Developer API - UNICO Card & Payroll - Alpha Exchange

Phase 3 – Market Expansion - DEX & CEX growth - Merchant adoption - External liquidity integration - Referral Program rollout

Phase 4 – Ecosystem Maturity - Cross-chain bridges - DAO governance implementation - Strategic institutional partnerships - Full UNICO Wallet integration with all services

---
